

Dear Mount View Families,

It's time to celebrate! The students have completed their second option of Enrichment, and are excited to share with you what they have learned. The students are so proud of the projects they have created. They want to show them off!

You're invited to celebrate student's learning on **Friday, June 7<sup>th</sup> from 12:00 - 12:35**

There will be two rounds of presentations to allow for the opportunity to view more than one Enrichment project. The first round of presentations will take place 12:00 - 12:15. The second set of presentations will take place from 12:20 - 12:35.

**First presentations 12:00 - 12:15; Second presentations 12:20 - 12:35**

Below is an outline of the Enrichment projects that will be shared during our Enrichment Celebration of Learning.

| Teacher     | Enrichment / Room Number           | Project Description                                                                                                                                                                                                                                                                                            |
|-------------|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ms. Baker   | Performance Arts Kindergarten Room | Division 1 students have been learning about the basics of stop motion, including creating flip books, creating cut out animations and learning how to operate and create a film in the apps, iMovie and Stop Motion Studio. The students are proud to present a screening of their stop motion films.         |
| Ms. Bagshaw | Leadership Room 5                  | The students are excited to share the ways they have demonstrated kindness and leadership within the school. Come meet the authors of the inspirational quotes posted on the school's message board. Hear about the ways they've been working with other students in the school by volunteering in classrooms. |
| Ms. Ngo     | Plant-to-Plate Room 6              | Students have been learning how to grow microgreens, plant parts and their function, and what parts of the plant we eat when we eat fruits and vegetables, as well as beans and seeds. Students will be showcasing a plant part, the foods we eat from that particular part of                                 |

|                 |                        |                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-----------------|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                 |                        | the plant, and examples of dishes that can be made from those foods.                                                                                                                                                                                                                                                                                                                                                                     |
| Ms. Ferridge    | Art Room 7             | Join us as we showcase the incredible talents and artistic accomplishments of our talented young artists. During this time, your child will share their Art Portfolio, featuring a collection of their artwork as well as reflect on the techniques, art media and creative process for each art piece. This event is a wonderful opportunity for you to witness the creativity that has flourished within our Art Enrichment this term! |
| Ms. Gale        | Stop Animation Room 8  | During enrichment, students have been viewing some stop-animation films, learning new terminology and experimenting with different techniques for creating our own stop-animation films. We have been working hard on designing characters, sets and creating our projects. We hope you enjoy.                                                                                                                                           |
| Ms. Wlock       | Bridge Design Room 9   | Students have worked hard to create model bridges, applying the knowledge they gained this term as they studied and learned about different bridges. Come and test your bridge building skills, alongside the students, as they show case an arch bridge and their own original designs.                                                                                                                                                 |
| Ms. Brandt      | Ozobots Room 10        | Throughout the term, students have completed a number of Ozobot challenges and have now built their own with an objective for their Ozobot to complete. From mazes, games, races and dance-offs, come and see what our Ozobots can do!                                                                                                                                                                                                   |
| Ms. Mondegarian | Indigenous Art Room 11 | Come for a gallery walk through Room 11 and enjoy a variety of unique art created by Grade 1-3 students. Each art piece is inspired by an Indigenous artist from Canada.                                                                                                                                                                                                                                                                 |

|         |                        |                                                                                                                                                                                                                                                                                                                                  |
|---------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mr. Lee | Board Games<br>Room 12 | Board Games can provide opportunities for students to play a number of different games which encourage the development of problem solving, communication, turn-taking, math and literacy skills. Using their knowledge of different board games, the students have created their own board games that can be shared with others. |
|---------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

The students are looking forward to sharing their learning and projects with you at our Celebration of Learning for Enrichment.
